

to whom it may concern: i am a long distance tractor/trailer for 36 years and the best thing that i have had to listen to is xm radio. the weather and traffic channels on xm radio is great . we can listen in bad weather to both traffic hazards and safety hazards onthe road and make a safe choice to stop before we have trouble . i have 3 xm radios. 1 in my tractor/trailer for my coast to coast driving 1 in my personel car and 1 in my wifes car . i have invest almost 1000.00 in xm radios just to feel safe and stay safe when i am doing my job and or spending time with my family.
thank you for letting me make my feelings known about my xm radio service
